

Editorial

"First issue of the New Year. Wishing you all readers Happy, healthy & wealthy life."

Our Journal got indexed very good & important news Kudos due to our team's constant efforts. This will make our journal quality at par with other international Publications. This will also increase the numbers of articles per Journal. We will continue to improve the quality and variety of Journal's articles. A milestone in our journey of Publication pathway.

We will also increase the numbers of quarterly bulletin to cope up with number of articles to keep pace & update the knowledge of reader's interest before it gets late.

Off the point is increasing pollution in Delhi & other part of India due to falling winter. This is making all ages suffer with lung's problems.

We also reported one positive young pregnant female with positive HIV infection confirmed by all other tests, luckily her husband was negative. How come in our pathological lab setup? May be in his window period.
